COMMERCIAL EXPERIENCE

Full Stack Developer (Frontend-focused) | Confidential company (NDA) Jul 2025 - Aug 2026

- Built and maintained TypeScript/React/Next.js web features, responsive interfaces and API-driven user flows.
- Implemented integrations and server-side data flows with external APIs, Supabase persistence and GA4/GTM analytics.
- Debugged frontend/API issues, improved loading and error states, and validated changes before deployment.

SELECTED TECHNICAL PROJECTS

Developer Profile API NestJS · GraphQL · Prisma · PostgreSQL · Docker
Built a GraphQL backend with relational profile data, resolver/service separation, migrations, automatic seed and Docker Compose startup guarded by PostgreSQL health checks.

Blogger Analytics Dashboard Next.js · TypeScript · Supabase · Apify API
Integrated an external analytics API through server routes, normalized and persisted blogger/video records, and built API-driven dashboard views.

Frontend Checkout Challenge React · TypeScript · REST APIs
Implemented a checkout application with server-managed cart/quotes, delivery and payment-option flows, polling, idempotent actions, retries and state restoration after refresh.

Frontend Canvas Challenge React · TypeScript · React Flow
Built a graph editor with REST persistence, debounced saving, ETag/If-Match optimistic concurrency, conflict handling and idempotency.

Dell Offers Landing Next.js · Supabase · GA4 / GTM
Implemented a landing and server-side CTA tracking flow with unique click IDs, database persistence and HTTP redirects; added client-side analytics.
